MECHANISMS OF AGEING AND DEVELOPMENT

SUBJECT INDEX

Volume 68 (1993)

Age, fish brain, ammonia, glutamine, GDH, 47
Age, immune compartments, dog, lung, antibodies, 191
Aged muscle, hypokinesia/hypodynamia, enzymes, electrical stimulation, hindlimb suspension, 117
Ageing, *Drosophila*, light, methylene blue, riboflavin, photosensitizer, 175
Ageing, amyotrophic lateral sclerosis, Gompertzian analysis, mortality, epidemiology, 137
Ageing, growth hormone, transgenic mice, animal model, life span, pathology, 71
Ageing, lymphocytes, THC, T cells, immunity, mice, splenocytes, 11
Ageing, mitochondria, outer membrane hypotonic fragility, rotenone-insensitive NADH oxidation, Mg^{2+}-ions, cytochrome *c*-membrane interaction, 221
Ageing, neurotrophic, sympathetic, autonomic nervous system, nerve growth factor, development, 163
Ageing, protein turnover, muscle, liver, 209
Aging, cell proliferation, cell cycle analysis, dietary restriction, mouse, 151
Aging, development, 6-phosphfructo-1-kinase, fructose-2-6-bisphosphate, energy metabolism, metabolic regulation, 37
Aging, immunology, SENIEUR protocol, reference values, laboratory parameters, plasma lipids, 105
Aging, thioproline, murine lymphocytes, proliferation, mobility, chemotaxis, 27
Ammonia, age, fish brain, glutamine, GDH, 47
Amyotrophic lateral sclerosis, Gompertzian analysis, mortality, ageing, epidemiology, 137
Animal model, growth hormone, transgenic mice, ageing, life span, pathology, 71
Antibodies, immune compartments, dog, lung, age, 191
Autonomic nervous system, neurotrophic, sympathetic, nerve growth factor, ageing, development, 163
Blood flow, dogs, hemodynamics, isometric exercise, sympathetic reflexes, 89
Bufo bufo, glutathione, glutathine transferases, embryo, development, 59

Ca^{2+}-ATPase, energy restriction, Torpor, 183
Caenorhabditis elegans, oxygen-sensitive Mutant, development, life span, radiation sensitivity, 1
Cell cycle analysis, cell proliferation, dietary restriction, aging, mouse, 151
Cell proliferation, cell cycle analysis, dietary restriction, aging, mouse, 151
Cerebral cortical membranes, development and ageing, TCP binding, phencyclidine sites, inhibitory amino acids, 125
Chemotaxis, thioproline, aging, murine lymphocytes, proliferation, mobility, 27
Cytochrome *c*-membrane interaction, ageing, mitochondria, outer membrane hypotonic fragility, rotenone-insensitive NADH oxidation, Mg^{2+}-ions, 221

Development and ageing, cerebral cortical membranes, TCP binding, phencyclidine sites, inhibitory amino acids, 125
Development, aging, 6-phosphfructo-1-kinase, fructose-2-6-bisphosphate, energy metabolism, metabolic regulation, 37
Development, glutathione, glutathine transferases, *Bufo bufo*, embryo, 59
Development, neurotrophic, sympathetic, autonomic nervous system, nerve growth factor, ageing, 163
Development, oxygen-sensitive mutant, *Caenorhabditis elegans*, life span, radiation sensitivity, 1
Dietary restriction, cell proliferation, cell cycle analysis, aging, mouse, 151
Dog, immune compartments, lung, antibodies, age, 191
Dogs, blood flow, hemodynamics, isometric exercise, sympathetic reflexes, 89

Drosophila, light, ageing, methylene blue, riboflavin, photosensitizer, 175

Electrical stimulation, aged muscle, hypokinesia/hypodynamia, enzymes, hindlimb suspension, 117
Embryo, glutathione, glutathine transferases, *Bufo bufo*, development, 59
Energy metabolism, aging, development, 6-phosphfructo-1-kinase, fructose-2-6-bisphosphate, metabolic regulation, 37
Energy restriction, Ca^{2+}-ATPase, Torpor, 183
Enzymes, aged muscle, hypokinesia/hypodynamia, electrical stimulation, hindlimb suspension, 117
Epidemiology, amyotrophic lateral sclerosis, Gompertzian analysis, mortality, ageing, 137

Fish brain, age, ammonia, glutamine, GDH, 47
Fructose-2-6-bisphosphate, aging, development, 6-phosphfructo-1-kinase, energy metabolism, metabolic regulation, 37

GDH, age, fish brain, ammonia, glutamine, 47
Glutamine, age, fish brain, ammonia, GDH, 47
Glutathine transferases, glutathione, *Bufo bufo*, embryo, development, 59
Glutathione, glutathine transferases, *Bufo bufo*, embryo, development, 59
Gompertzian analysis, amyotrophic lateral sclerosis, mortality, ageing, epidemiology, 137
Growth hormone, transgenic mice, animal model, ageing, life span, pathology, 71

Hemodynamics, blood flow, dogs, isometric exercise, sympathetic reflexes, 89
Hindlimb suspension, aged muscle, hypokinesia/hypodynamia, enzymes, electrical stimulation, 117
Hypokinesia/hypodynamia, aged muscle, enzymes, electrical stimulation, hindlimb suspension, 117

Immune compartments, dog, lung, antibodies, age, 191
Immunity, ageing, lymphocytes, THC, T cells, mice, splenocytes, 11
Immunology, aging, SENIEUR protocol, reference values, laboratory parameters, plasma lipids, 105
Inhibitory amino acids, development and ageing, cerebral cortical membranes, TCP binding, phencyclidine sites, 125
Isometric exercise, blood flow, dogs, hemodynamics, sympathetic reflexes, 89

Laboratory parameters, immunology, aging, SENIEUR protocol, reference values, plasma lipids, 105
Life span, growth hormone, transgenic mice, animal model, ageing, pathology, 71
Life span, oxygen-sensitive mutant, *Caenorhabditis elegans*, development, radiation sensitivity, 1
Light, *Drosophila*, ageing, methylene blue, riboflavin, photosensitizer, 175
Liver, ageing, protein turnover, muscle, 209
Lung, immune compartments, dog, antibodies, age, 191
Lymphocytes, ageing, THC, T cells, immunity, mice, splenocytes, 11

Metabolic regulation, aging, development, 6-phosphfructo-1-kinase, fructose-2-6-bisphosphate, energy metabolism, 37
Methylene blue, *Drosophila*, light, ageing, riboflavin, photosensitizer, 175
Mg^{2+}-ions, ageing, mitochondria, outer membrane hypotonic fragility, rotenone-insensitive NADH oxidation, cytochrome *c*-membrane interaction, 221
Mice, ageing, lymphocytes, THC, T cells, immunity, splenocytes, 11
Mitochondria, ageing, outer membrane hypotonic fragility, rotenone-insensitive NADH oxidation, Mg^{2+}-ions, cytochrome *c*-membrane interaction, 221
Mobility, thioproline, aging, murine lymphocytes, proliferation, chemotaxis, 27
Mortality, amyotrophic lateral sclerosis, Gompertzian analysis, ageing, epidemiology, 137
Mouse, cell proliferation, cell cycle analysis, dietary restriction, aging, 151
Murine lymphocytes, thioproline, aging, proliferation, mobility, chemotaxis, 27
Muscle, ageing, protein turnover, liver, 209

Nerve growth factor, neurotrophic, sympathetic, autonomic nervous system, ageing, development, 163
Neurotrophic, sympathetic, autonomic nervous system, nerve growth factor, ageing, development, 163

Outer membrane hypotonic fragility, ageing, mitochondria, rotenone-insensitive NADH oxi-

dation, Mg^{2+}-ions, cytochrome *c*-membrane interaction, 221
Oxygen-sensitive mutant, *Caenorhabditis elegans*, development, life span, radiation sensitivity, 1

Pathology, growth hormone, transgenic mice, animal model, ageing, life span, 71
Phencyclidine sites, development and ageing, cerebral cortical membranes, TCP binding, inhibitory amino acids, 125
6-Phosphfructo-1-kinase, aging, development, fructose-2-6-bisphosphate, energy metabolism, metabolic regulation, 37
Photosensitizer, *Drosophila*, light, ageing, methylene blue, riboflavin, 175
Plasma lipids, immunology, aging, SENIEUR protocol, reference values, laboratory parameters, 105
Proliferation, thioproline, aging, murine lymphocytes, mobility, chemotaxis, 27
Protein turnover, ageing, muscle, liver, 209

Radiation sensitivity, oxygen-sensitive mutant, *Caenorhabditis elegans*, development, life span, 1
Reference values, immunology, aging, SENIEUR protocol, laboratory parameters, plasma lipids, 105
Riboflavin, *Drosophila*, light, ageing, methylene blue, photosensitizer, 175
Rotenone-insensitive NADH oxidation, ageing, mitochondria, outer membrane hypotonic fragility, Mg^{2+}-ions, cytochrome *c*-membrane interaction, 221

SENIEUR protocol, immunology, aging, reference values, laboratory parameters, plasma lipids, 105
Splenocytes, ageing, lymphocytes, THC, T cells, immunity, mice, 11
Sympathetic reflexes, blood flow, dogs, hemodynamics, isometric exercise, 89
Sympathetic, neurotrophic, autonomic nervous system, nerve growth factor, ageing, development, 163

T cells, ageing, lymphocytes, THC, immunity, mice, splenocytes, 11
TCP binding, development and ageing, cerebral cortical membranes, phencyclidine sites, inhibitory amino acids, 125
THC, ageing, lymphocytes, T cells, immunity, mice, splenocytes, 11
Thioproline, aging, murine lymphocytes, proliferation, mobility, chemotaxis, 27
Torpor, Ca^{2+}-ATPase, energy restriction, 183
Transgenic mice, growth hormone, animal model, ageing, life span, pathology, 71
